Embrace the bee

What's more fun than creating memes together with strangers on the internet? Well, how about getting paid for doing so!

Daobee is a free-to-earn NFT-creation browser-game in which players create exciting art, memes and stories together with others. All artworks created on Daobee are put up for public auction as NFTs and all earnings get shared equally between the players and Daobee.

Create art together!

The core idea is simple: Starting with just a title all players have limited time to draw the most exciting, beautiful or funny picture they can think of. All suggestions are put up for vote in order to decide which picture is the best! The winning picture becomes the starting-point of the next round, where players change and manipulate the picture to improved. This goes on for a set number of rounds or until the players agree to end the game.

Daobee connects – “Bees together strong”

NFTs play a vital role on Daobee. They unlock functional and cosmetic features for their holders. Some NFTs will directly unlock unique and exclusive perks while others will add points to their users “Honey-meter” - a counter that unlocks more and more features as the number goes up!

Daobee will also accept **partner NFTs** to unlock features and add to the Honey-meter, making it IOTAs first "**Layer-2 NFT utility**" provider and catalyzer of the NFT ecosystem!

Design Principles

Access, connect, multiply, earn together

Be accessible

Daobee will bring in new audiences into IOTA by being fun, accessible and free to play! While most crypto-games shock their new users with considerable starting-costs, Daobee will welcome everyone - without upfront cost or any prior crypto-experience. However, only with a connected wallet users will be able to earn while playing, creating interest in newcomers to make their first steps into crypto.

Connect – With art and memes

We believe that connecting people with art and games will always unleash everyone's best creative potential. On Daobee people from all walks of life will form a melting pot of wild ideas and cultures - a birthing place of new creations and viral memes.

Multiply - Connecting the IOTA NFT ecosystem

Daobee will allow partnering NFTs to unlock features on the platform - a new concept that we call "Layer-2 NFT utility". This will accelerate growth and community in the whole NFT ecosystem and introduce a whole new layer of answers to the age-old question "what are NFTs good for?".

Earn together

Players create value for other players - the core of Daobee's play2earn philosophy. No "new-players-pay-old-players" pyramid-schemes: Everyone will be able to play Daobee for free and earn \$BEES just by creating art, memes and utility-NFTs for the community.

Gameplay

Daobee is all about creating art and stories together and selling them as NFTs. The first release will feature two main game modes:

Picture games

Starting with only a title all players have several rounds with limited time to create the most exciting, funny or creative picture. All suggestions are put up for vote in order to decide which one wins the round. The winning picture becomes the starting point for the next round and will be modified and changed by the players to become even more exciting, funny or creative! The game continues for a set number of rounds or until the players agree to end it.

Text games

Players create stories, poems, jokes or any other kind of text, inspired by just a title and, optionally, a starting sentence. Over the course of several rounds new words and sentences get added to the growing text by the players, thereby creating a true collaborative multi-author artwork.

NFT-Auctions

After every game the resulting artwork is put up for public auction as a NFT. All earnings of these auctions are shared equally between the authors and Daobee.

Unlockable features

Daobee offers functional and cosmetic features to spice up games and to express emotions and reactions. This includes super-votes, timer-manipulation, highlights, special emojis, stickers and much more. All these features can be unlocked simply by holding accepted NFTs (see chapter: "NFTs").

Free2Earn

Free2Play

Daobee is the first project to spearhead the concept of “Free2Earn” crypto-gaming - a combination of the two established concepts “Free2Play” and “Play2Earn”. While all core functions on Daobee will be available for free, players will have the opportunity to earn \$BEES cryptocurrency in the process of playing.

Being a free2play browser-game will considerably lower the barrier of entry for new players and attract new and crypto-naive audiences. However, while playing will be for free, earning \$BEES and accessing all features will only be possible when connecting with a crypto wallet. This will create interest and a strong incentive for newcomers to make their first steps into the world of crypto and IOTA specifically.

Play2Earn

At the end of each game the collaboratively created artwork will be put up for public auction as a NFT. All earnings from this auction will be shared equally between Daobee and the creators, giving players an earning opportunity with every single game.

Daobee NFTs will not only have meme- and artistic value, but they will also unlock features on the Daobee platform.

Daobee-NFTs

Create and collect to unlock features

NFTs play a vital part on all levels of the Daobee experience. Not only do players collaboratively create new NFTs in their games, but holding any kind of accepted NFT in their wallets unlocks functional and cosmetic features.

Two ways to unlock new features on Daobee with NFTs:

Daobee premium NFTs

Some NFTs are *premium*, which means that they unlock unique, NFT-specific features to their holders. The first example for that will be the upcoming *Daobee family* NFT collection in which each character will unlock character-specific features.

Honey-meter (number go up)

All accepted NFTs points to the Honey-meter of their holder. This counter unlocks more and more features on Daobee as it rises. However not all NFTs are created equal: Some add more points to the counter than others, depending on their value.

Three different kinds of Daobee NFTs

Daobee original collections

Daobee original NFTs are created and released directly by Daobee. They are **premium** NFTs that grant unique perks to their owners while also adding to their Honey-meter.

The first example is the **Daobee-Family**, which represents the Daobee team members. They will be obtainable only in the upcoming NFT crowdfunding event. They let their holders participate in the upcoming \$BEES airdrops and grant access to Daobee beta-testing.

Daobee community NFTs

Daobee community NFTs are created by users playing on Daobee. After each game is finished the resulting artworks are put up for public auction and sold to the highest bidder. All Daobee user NFTs add to the Honey-meter of their holder. Their value is proportional to the buying price at their original NFT-creation auction - meaning the higher the price the more features it unlocks!

Daobee partner NFTs

Daobee connects the whole IOTA NFT ecosystem, by letting NFTs from partnering projects unlock features. This will make Daobee into the first layer-2 NFT utility provider on IOTA. Partner NFTs will add to their users Honey-meter and, in special cases, even go full-on **premium** with unique features!

Layer-2 NFT utility

IOTAs first NFT ecosystem-multiplier

Daobee is more than a crypto-game – It is the connecting tissue and a catalyzer for the whole IOTA NFT ecosystem. Daobee will allow NFTs from partnering projects to unlock new features on its platform. This brings in a completely new dimension of ecosystem synergies that we call “Layer-2 NFT utility”.

Bees together strong – a win-win-win situation

Synergies are situations in which all involved parties benefit from each other. Layer-2 NFT utility platforms like Daobee enable a triple-win for the NFT ecosystem.

Win for the NFT holders

Every holder of a partnering NFT gains extra utility without the need to pay any additional costs.

Win for the NFT projects

NFT projects gain additional utility for their NFTs and a stronger sales-pitch to their customers.

Win for the layer-2 NFT utility platform

Providers of layer-2 utility tap directly into existing NFT communities and gain higher attention and a wider community.

The missing puzzle piece

Layer-2 utility will connect isolated NFT projects and amplify the utility and value of whole NFT ecosystems.

As a first-mover we expect Daobee to increase the value of the IOTA NFT ecosystem and potentially set a new trend of layer-2 utility for future projects.

\$BEES

Daobee's utility cryptocurrency

Daobee Token (\$BEES) will be the central currency on Daobee. \$BEES will be a full-fledged cryptocurrency based on IOTA. As with other cryptocurrencies, users will be able to trade and store their tokens freely – a fundamental addition of freedom in comparison to conventional in-game currencies.

Use \$BEES to:

- Bid for NFTs in public auctions. All earning from public auctions will go to the NFT creators (50%) and to Daobee (50%).
- Tip other players as a reward for their great work. You will be able to tip individual users or games, in which case all co-authors will receive an equal share.
- Buy emojis, awards and in-game features directly from Daobee

\$BEES Tokenomics

Total supply: 1.000.000.000 (One billion \$BEES)

Burn: A proportion of \$BEES in the Daobee treasury will regularly get burned

Initial distribution of \$BEES

Ecosystem and early users 60%

Rolling airdrop to Daobee family NFT holders (10% of total \$BEES)

Daobee family NFT holders will continue to receive \$BEES for years to come.

Initial DeFi liquidity

Daobee will be available on established IOTA DeFi platforms.

Promotion and early-users-airdrops

Early Daobee users and supporters will be rewarded with \$BEES.

Initial airdrops 7.5%

Initial Daobee family NFT airdrop (5%)

Holders of Daobee family NFTs will receive 7.5% of total \$BEES in an initial airdrop.

Airdrop to IOTA community (2.5%)

We will give back to the IOTA community by airdropping \$BEES to every IOTA mainnet token holder.

Growth and development 12.5%

Funds to pay operational costs, servers, future team members and other expenses.

Partnerships 10%

A reserve used to attract and reward future partners and investors.

Team 10%

Daobee team members receive part of their compensation in the form of \$BEES. These will be unlocked over time to incentivise continued efforts.

Availability after release

\$BEES will be available on several IOTA DeFi platforms.

Initial liquidity will be ensured by Daobees liquidity pool.

Users will also be able to buy \$BEES directly on the Daobee platform using various cryptocurrencies and fiat.

DAOBEE TEAM

Patrick the Penguin (Patrick Fischer)

Position: Co-founder, CEO + CTO

Bio: Crypto nerd and IOTA maximalist since 2017. Co-founder of the IOTA Content Creators DAO and dancer of Discord. Background as professional software engineer, went full-time crypto-degen in 2022.

Motto: "Ask and It Is Given"

Beny the Bear (Benedikt Naumann)

Position: Co-Founder, CDO

Bio: Full time nerd and crypto enthusiast. Likes to lift heavy and to dive way to deep into nerdy topics. Hodling cryptos since the early days and believes IOTA will win. Aims to be a full-time crypto degen soon™.

Motto: "Levo ergo sum."

Linus the Lizard (Linus Naumann)

Position: Co-founder, COO, marketing

Bio: Long-time IOTA supporter, tech-educator and co-founder of the IOTA Content Creators DAO. Background in genetic engineering and science communication at Max-Planck Institute before going full crypto-degen.

Motto: "Sometimes you reap what you sow!"

Felicia the Fox (Felicia Kaßenbrock)

Position: Lead UI / UX Designer

Bio: Crazy designer with a love for detail and more than 10 years of professional experience. Lover of handcrafts. Master of arts in media production. Originally from Indonesia, now living in Germany. IOTA hodler.

Motto: "Daobee to the moon!"

Razz the Rabbit (Lee Carulli)

Position: GFX Designer

Bio: Lover of sweets, artist for the bee's, crypto student and dedicated IOTA lass. IOTA Content Creators DAO. Background in all things creative; painting, pottery, cake decorating, and illustrations on the tangle.

Motto: "Turn obstacles into opportunities."

Roadmap

Daobee reveal + whitepaper

Introducing Daobee to the public and bringing in early community.

NFT sale + partnership reveals

Funding Daobee and setting sails for development

Closed beta

Early community will be invited to help with testing.

Open beta

Everybody can play! Help us making playing Daobee the best experience possible!

Daobee 1.0

We did it! Play Daobee for free, create and earn with others!

Expand the bee!

Adding new game modes, features and mobile support!
